

# Allocating supervisors

GBI, DIM, ILM

## Suggestion for the process (GBI/DIM mainly)

- 1) Late September (after course manning process): HoD and HoSP make prognosis for number of thesis students and number of supervisors available. ILM vs. GBI/DIM taken into account
- 2) Students receive email asking them to submit wishes for supervisor(s)
- 3) November 1: Deadline for students in submitting 3-5 wishes (with name, programme, keywords/topic)
- 4) November 10: HoSP (or other delegates) meet and allocate based upon student wishes. This is followed by a brief hearing among faculty (Any problems we have overlooked? Any wishes for swapping?)
- 5) Deadline for allocation December 1 (GBI/DIM)
- 6) First meeting with supervisor in December

# Questionmarks

- 1) What is a fair distribution? Equal share? Max/min?
- 2) How do we ensure that all students submit a wishlist? (or know if they are not writing a thesis at this point in time)
- 3) Are there any issues in integrating this with the project base and/or LearnIT?
- 4) Any legal/administrative issues?
